EMOTIONAL INTELLIGENCE IN DESIGN

From game maker companies of the global economy to start-ups, from flat offices with 4 meter high ceilings to home offices, living spaces is being redefined. A reflection of the value you give to you employee is hidden in what you offer to him/her in the space reserved for him/her.

To understand the user and to know about their needs is a necessity. Products that understand user needs well an even offer new habits are always popular.

Nurus People have stuck loyally to the same ethical values since 1927.

Deep roots...

Nurus, from 1927 to the present, makes difference in the management and design of professional furniture with a contemporary approach. Nurus offers thousands of products that are user centered and care about environmental factors.

Nurus People have stuck loyally to the same ethical values for years; it is a large family consisting of employees, designers, suppliers, solution partners and users. Each member of the family is bound together by trust and loyalty.

Where ideas, objects and people meet.

As a leader global brand who's known for its innovations within the sector, Nurus has been sharing its expertise with customers in nearly 40 locations through a network of more than 50 retailers since 1927. The company is strengthening its position in the Gulf countries by increasing the number of monobrand stores with the goal of becoming the regional leader.

The operations have been strengthened with the strategic step of opening the Nurus MENA management center in Dubai. A new management and sales center in Munich which is a major city for logistics and finance has launched in 2015. Nurus as the owner of many national and international awards by independent juries, has a very important and active role in creating awareness for awarding systems in the eye of consumers, producers and designers in Turkey.

SUSTAINABILITY

Being human
is to care for
future generations.

Nurus understands, stands by, empathizes with humankind, and performs its responsibilities meticulously in every phase of manufacturing because of its farsightedness and the sustainability of life. Its production is done at a building that makes the most of natural daylight, which can use rainwater for watering the garden, which increases the quality of air and the amount of clean air inside the building, which has architectural characteristics that comply with green building criteria thanks to its heating-cooling and advanced acoustic management.

Nurus makes sure
that the materials
used in manufacturing
are in conformity
with international norms
and standards, are
certified, recyclable and
environmentally friendly.

beORIGINAL
Member

Nurus is a member of FIRA and BIFMA and holds the EN ISO 9001:2001 certificate since 1996, EN ISO 14001:2004 certificate since 2004 and OHSAS 18001:2007 certificate since 2007 to present.

INNOVATIVE APPROACH

Nurus Design Lab® cooperates with other designers in harmony and cooperation.

Nurus Design Lab is effective in every phase, from determining the design strategy of the brand to launching the product in the market. During the product development phase, Nurus Design Lab cooperates with other designers in harmony and cooperation. The starting point for the designs is the user's needs and functionality. The phase continues with ergonomics, sustainability and aesthetic concerns and stays up-to-date by following technological developments.

Innovative designs and products beyond their time.

For Nurus, design is not a beginning but the end of a phase that begins with need. Nurus understands the changing needs of people and produces solutions that are beyond its time, designing products that shape the future with its innovative approach based on research-development.

The intergration of design and engineering.

Thanks to the **Nurus Links®** system found in Nurus products, you can match your electronic devices with your furniture, transfer information from your devices, and organize video-conferences; you can rapid charge your device, or if you wish, easily take care of business with multi-media features available.

DIGITAL CHAIN

Nurus Solutions work with zero margin.

of error in a variety of projects ranging from education to transportation. The whole process from the project phase to the use of products is inspected on a digital platform at every step. The **Digital Chain**® it developed produces generic solutions specific to projects.

Nurus works hard to mitigate the environmental impact of its operations, including from procurement to production, from packaging to distribution.

Nurus developed the Nurus Digital Chain® system as part of its integrated project management and logistics services in order to maintain high quality production while conserving energy and resources.

Management
Honorable Mention
Award from Design
Management Institute
(DMI).

Design literature is
collected by Nurus in
Turkish Touch in
Design as the first
book in Turkey.

2013

Technology
base

45000 m²
technology based
manufacturing plant
has come into
operation in
Ankara.

2014

Nurus
Dubai

Nurus Dubai
administrative office
was opened for the
Middle Eastern market.

2015

Nurus
Munich

administrative office
and showroom was
opened.

Nurus Solutions

Office Solutions

Happy Offices.

From corporate offices to home offices, from start-ups to well-established corporations, Nurus analyzes the changing needs of its customers with different structures who are operating in various industries, and offers tailor made solutions to their changing working requirements.

It produces people-oriented solutions for "happy offices" with its ergonomic, functional designs which affects the efficiency and motivation positively.

Shaping the future of working life as a leading brand of the industry with its vast knowledge and expertise, Nurus maintains an integrated and faultless process management from production until to the delivery thanks to Nurus Digital Chain® system.

Education Solutions

Innovative Products in Education.

Nurus designs innovative products suitable to the changing dynamics of education, also feeding from its large-scale projects in the global markets.

By reading the difference between the needs of a fashion design school and a school, which is training a mechatronics technician, Nurus creates projects that are suitable to the targets and needs of educators. Nurus is a "single point" supplier with the product custom designed for projects and its standard product range.

The Digital Chain® it developed produces generic solutions specific to projects.

Health Solutions

Success Runs in the Blood of Nurus.

Nurus, designing every detail with technology, experience and care, provides convenient solutions for the health industry with their products that offer personal comfort to users.

Nurus understands every need that personnel and patients both have, and responds to these needs with innovative designs.

The Nurus Digital Chain® system functions with zero error margin in every project ranging from education to transportation, office buildings to health institutions, from the beginning of the project up until its delivery.

Terminals Solutions

Rational Products in Terminals.

Terminals where human traffic flow is the most intense produce different requirements for staff and passengers. With the changing speed of technology, human behaviors and habits also change rapidly.

While Nurus products answer the needs of passenger and terminal staff with innovative designs.

Nurus Digital Chain®, produces unique solutions for each project with its capacity to adapt.

Contract Projects

Nurus Expertise.

Nurus offers turn-key solutions for special contract projects by combining its expertise in different lines of business with its technological production substructure.

Its special solutions designed for various projects from hotels to hospitals, from offices to universities and even to airports meet the user requirements with its fixed and movable furniture options.

As a single point supplier, Nurus offers a total solution to its customers in accordance with the project size and its complex structure thanks to Nurus Digital Chain® system developed by Nurus.
